Job Summary

We are seeking an experienced Sitecore Full Stack Developer to join our development team. In this role, you will be responsible for developing, implementing, and maintaining Sitecore-based web solutions. You will work closely with internal team to deliver high-quality, scalable, and effective websites. The ideal candidate will have strong technical skills in both front-end and back-end development, as well as experience with Sitecore and other CMS technologies.

Qualifications:

Required:

- Bachelor's or Master's degree required, preferably in Computer Science or a related field.
- Minimum 5+ years of experience as a Sitecore developer or development experience with other enterprise ASP.NET MVC based CMS.
- Proficiency with Sitecore Experience Manager (XM) versions: 9.x, 10.x.
- Strong skills in CSS3, SASS, JavaScript, JQuery, JSON, AJAX, XML, and familiarity with modern JS frameworks (preferably React) with a focus on usability/accessibility, and experience with frontend frameworks such as Bootstrap or Foundations.
- Experience with ASP.NET MVC Framework, C#, SOAP, REST, Web API.
- Knowledge of MS SQL is must but Oracle/MySQL
- Experience with Git version control system.
- Azure DevOps
- Communication: Strong verbal and written communication skills.

Preferred:

- Certifications: Sitecore Certified software Developer or Sitecore MVP status.
- Advanced Skills: Experience with Sitecore XM Cloud, Sitecore Helix architecture, Sitecore SXA, or Sitecore JSS.
- Experience with Agile methodologies

Key Responsibilities:

- Project Collaboration: Collaborate with designers, business analysts, and project managers to gather requirements, design solutions, and deliver projects on time.
- Front-End Development: Collaborate with UX/UI designer to implement templates using HTML, CSS, SASS, JavaScript, and front-end frameworks such as React.js.
- Back-End Development: Develop and maintain server-side applications using .NET technologies, including C#, ASP.NET MVC, and Web API.
- Integration: Implement and manage integrations between Sitecore and third-party systems, such as Salesforce CRM, and marketing automation platforms.
- Technical Support: Provide technical support and troubleshooting for Sitecore-related issues, both for clients and internal stakeholders.
- Best Practices: Follow best practices or industry standard for coding, testing, and deployment. Ensure adherence to security and performance standards.
- Documentation: Knowledge in creating and maintaining technical documentation such as design and technical requirements for development processes, configurations, and user guides.

Benefits:

- Flexible work schedule
- Remote work
- Competitive compensation
